

HITACHI

MultiZone Reverse Cycle Systems

Cooling & Heating

air

Creating truly comfortable living spaces.

Multi split systems allow an outdoor unit to be connected to multiple indoor units and therefore cool or heat multiple rooms. Each indoor unit can be managed independently of each other to provide perfect comfort in every room.

Zone Control that's Fast and Efficient

Created with high efficiency in mind, Our MultiZone systems deliver cost effective comfort for your home.

- Compatibility with a range of indoor unit types such as wall mounted, ceiling cassette or ducted.
- The ability to improve aesthetics through the use of minimal outdoor units.
- Ease of operation via a user-friendly controller, which also facilitates easy and fast servicing by accurately displaying the status of all performance parameters.
- Optional remote for on/off function that enables automatic deactivation once a room becomes unoccupied.
- High durability, made possible by anti-corrosion and anti-dust coatings on the outer heat exchanger.

How to Choose Well?

1. Personalise your installation and connect up to 5 units with a single outdoor group.

The installation of a Multi-Split system consists of an external outdoor unit and 2 - 5 indoor units.

2. Choose the right interior unit for your home.

A wide range of indoor unit types allows you to select the units to suit the aesthetics and physical constraints of your home.

Flexibility in design

Hitachi MultiZone systems enable you to choose from a range of indoor unit types. You can select the temperature for each area, helping you create the perfect harmonious living environment.

2. Indoor Unit #1

3. Indoor Unit #2

4. Indoor Unit #3

5. Controller

Wall-Mounted

Efficient Performance

MOTION DETECT MODE

The sensor detects human movement when someone is in the room. When there is no movement for 20 minutes the set temperature shifts to save you power. If there is no motion detection after 20 minutes, the set temperature increases one degree when in cooling mode, after 40 minutes with no motion the set temperature will increase another one degree. In heating mode the set temperature will decrease.

Wide Angle Detection Area

Unparalleled Comfort

4-WAY AUTO DIRECTIONAL 3D AIRFLOW

The louvres not only move up and down automatically, but also left and right. This action disperses air over a much wider range to cool or warm the room efficiently and evenly. With the push of a button louvres can be set in any airflow direction to precisely control your comfort.

4-Way 3D Airflow

Active Carbon Filter	Active Carbon Filter	Active Carbon Filter

Active Carbon Air Purifying Filter

Stainless Steel Filter

RAK-15QPE & RAK-18~60RPE have mesh filter

AIR FILTRATION

Wall Mounted units, feature our cutting-edge Active Carbon air purifying filter that is proven to effectively capture and neutralise germs, bacteria, allergens, mould and odours.

All indoor units feature a washable pre-filter that absorbs and collects larger dust and pollen particles.

WHISPER QUIET

With the newly improved seamless fan control system, Hitachi's air conditioners assure extremely quiet and smooth fan speed changes for even more comfort.

COMPACT DESIGN

Standard design wall mount units, up to 5kW, are very compact at only 780mm wide. This enables flexibility when it comes to unit placement.

Ducted

CONCEALED UNIT

Subtle vents located throughout a home or office quietly and efficiently deliver conditioned air while maintaining a constant temperature. The unit is easily installed within a ceiling or wardrobe and is ideal for retrofits or new homes.

STATIC PRESSURE AND AIRFLOW

A highly effective multi-blade centrifugal fan provides efficient yet gentle airflow with minimal sound, even at high speeds.

BUILT-IN DRAIN PUMP

The unit is equipped with an internal drain pump to remove accumulated condensate from the drain pan during operation. This allows greater installation flexibility.

Floor

REMOVABLE FOOT

The removable foot of the Floor Console enables the flexibility to install the unit to suit the specific application.

EXTENDED FUNCTION

In large volumes (rooms in length), this function allows the unit to increase the range of airflow for optimum cooling and heating. Air is discharged at floor level, this ensures optimal comfort in heating mode.

Cassette

HIGH EFFICIENCY

Discreet and economical, our ceiling-mounted cassettes offer an effective solution for large open-plan areas or rooms with high ceilings.

QUIET AIRFLOW

These compact cassette units are designed for efficient airflow while minimising sound.

COMPACT SIZE

The 600mm x 600mm ceiling units fit neatly inside a standard office tile, minimising installation time and rendering them perfect for shop and office applications.

ONE-TOUCH PANEL

The panel can be swung open up to 90-degrees so that the washable filter can easily be removed for cleaning.

CONDENSATE DRAIN PUMP

Compact cassettes have inbuilt drain pumps to lift water from the drain pan.

Controllers

PREMIUM WIRELESS REMOTE

Comes standard with all wall and floor mounted units

- Weekly timer
- ECO mode
- Powerful mode
- Leave home
- Sleep mode
- Room temperature indication
- Power consumption display

SPX-WKT3 WIRED CONTROLLER

Optional for all indoor units types

- Weekly timer
- ECO mode
- Powerful mode
- Leave home
- Sleep mode
- Room temperature indication
- Power consumption display
- Backlight display
- Ventilation speed
- Temperature limiting function
- Operation mode lock
- Error history
- Key lock function

HALF SIZED WIRED CONTROLLER

Optional for all indoor units types

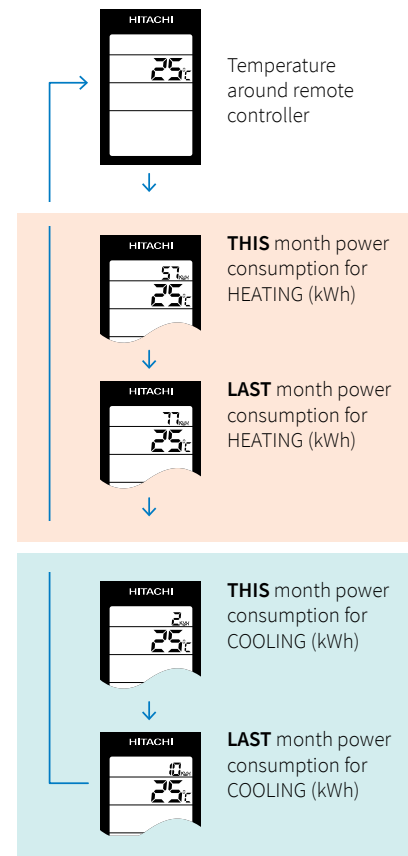

- Room temp indication
- 24 hour timer
- Sleep Mode

TRACKING POWER CONSUMPTION

The wireless controller enables you to monitor heat pump power usage, ensuring that there are no surprises when the electricity bill arrives.

Power tracking indication

Press the info button

POWERFUL MODE

Powerful mode will run your system at maximum cooling or heating as well as maximum fan speed for 20-minutes projecting airflow further and faster to cool or heat a room rapidly.

ECO MODE

Programmed to run your system at a slightly reduced rate, Eco Mode helps keep your power consumption to a minimum enabling you to achieve significant energy savings.

SLEEP MODE

A function that adapts fan speed and temperature to provide comfort conditioning while you're sleeping, Sleep Mode also prevents drafts that might disrupt a good night's sleep.

WEEKLY TIMER FUNCTION*

Totally eliminating the need to manually control your air conditioner, the Weekly Time Clock function enables you to pre-set your unit to automatically turn on and off or change temperature to suit your weekly routine. The seven-day timer function allows you to set up to six on/off time and temperature settings for each day of the week. You can even pre-set two seven-day schedules (mode A and B) and choose the desired schedule as required (e.g. winter or summer).

LEAVE HOME FUNCTION

This allows you to pre-set your air conditioner to start automatically if the internal temperature drops to 10°C while you're not at home. Ideal for use in locations that experience very cold conditions, this function can be instrumental in preventing the formation of dampness and mould.

Example of a programmed seven day schedule over summer

42 programs for each mode - 84 programs in total.

airCloud Home

Optional Accessory

Download today

www.aircloudhome.com

A smarter way to control your air conditioner. Anytime, anywhere.

CONTROL FROM ANYWHERE

Making sure your home is at the perfect temperature for when you arrive has never been easier. Hitachi airCloud Home allows you to remotely monitor and control your system from a single app through your smartphone.

CONTROL WITH YOUR VOICE

airCloud Home is fully compatible with Amazon Alexa and Google Assistant, enabling you to control your air conditioner hands-free.

SMART FENCE

Connect your air conditioner to your location and automatically stop and start your AC as you leave and return home.

AIRCLOUD FEATURES

- On / Off Operation
- ALL Units OFF
- Operation Mode Selectable
- Temperature Adjustment
- Smart Speaker (Google Assistant & Amazon Alexa)
- Smart Fence
- Weekly Scheduling
- On / Off Timer
- Adjustable Louvre
- Fan Speed
- Free firmware updates to latest features
- Unlimited units can be controlled through one app
- Account Management
 - Access for up to 20 users
 - Set up user permissions
- Customer Support
- Personalisation - Indoor unit naming
- Smart Notifications

Compact Outdoor Units

CONNECTIVITY

A single adapter on each system allow connectivity to Hitachi's H-link network. Suitable for commercial applications where multiple selected Hitachi products are required to be centrally controlled.

HIBERNATE MODE

Hibernate control allows improvement in energy savings by reducing standby power by 70%. This is achieved through the shutdown of non-active components.

COMPACT

Hitachi MultiZone outdoor units are compact so they are suitable for a wide range of residential and commercial applications where space is at a premium.

VECTOR CONTROL

Hitachi inverter compressors achieved improved energy savings through vector control which optimises compressor operation for high performance and lower noise levels.

EXTREME OUTDOOR TEMPERATURE OPERATION

Hitachi air conditioners can operate in outside temperatures down to as low as -15°C and as high as 46°C ensuring you stay comfortable when you need it.

MultiZone Range Capacities

YOU'LL FIND THE PERFECT MULTIZONE SOLUTION FOR YOUR HOME

With a wide selection of compact wall & floor mounted units, cassette units and concealed in-the-ceiling ducted units, our MultiZone indoor range caters for all requirements.
